

**TIRED OF NEVER GET
THE COLOR YOU WANT?
YES, US TOO.**

**THAT'S WHY WE CREATED
COLOR PACK.**

Color Pack is our calibration and color management software, designed to seamlessly integrate with your existing workflow and our printing solutions.

COLOR MATCH

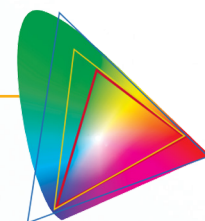

Any color. Anywhere. Anytime

- Extremely precise color reproduction - the color you get is the color you want, with a noticeable reduction of ΔE
- Fast processing - save time and resources with an immediate result
- Long-term consistency - achieve the same color over time, job after job
- Matched machines - identical color output across your entire printer fleet

COLOR BOOST

Get colors once out of reach

- Color gamut expansion — reach new colors by fully leveraging the pure color potential of your ink
- Pantone or target color matching with even the most challenging color requests — from the brightest colors to the deepest tones, replicate them all pixel by pixel

E-COLOR

Just the exact amount of ink

- Highly accurate fabric, ink and machine calibration - calculate the necessary amount of ink needed to achieve your desired color without oversaturating the fabric and wasting ink
- Optimized ink consumption — supporting both environmental sustainability and cost-efficiency by reducing waste and enhancing print quality
